NEW GOODS AND SPECIALTIES.

ONE INCH MICROMETER CALIPER NO. 12.

The Massachusetts Tool Co., Greenfield, Mass., are manufacturing a line of Micrometer Calipers with the merits of which the Hardware trade should become familiar. Their One Inch Micrometer Caliper No. 12, an illustration of which we present herewith, is shown nearly full size, has frame drop forged from steel bar. Has decimal equivalents stamped on frame. Has every necessary compensation for wear, and the following special

ONE INCH MICROMETER CALIPER NO. 12.

features: An eccentric locking device, convenient to operate, and which holds the screw at any desired position where transfers are desired. A square end thimble, designed to meet the ideas of those preferring this style. A Finer Graduation than is usually found upon Micrometers, is being marked for reading half-thousandths. A hardened cast steel spindle running in a hardened steel bushing, obviating any possible chance of roughing up or wear. A Hardened Steel Anvil, having face, shoulder and stem in perfect alignment with spindle and admitting of accurate adjustment from this end. They also manufacture this caliper with metric measurements. No. 12 M. prices same as No. 12.
